NOTE FROM THE PRESIDENT <i>Christopher T. Gates</i>	211
ARTICLES	
Social Capital and New Urbanism: Leading a Civic Horse to Water? <i>Thomas H. Sander</i> The first task in understanding the relations between social capital and New Urbanist design is to establish the requisite conceptual clarity for inquiry. Thomas Sander accomplishes this and provides an insightful review of the existing studies to date.	213
Sprawl, Politics, and Participation: A Preliminary Analysis <i>Thad Williamson</i> This article is a model of accessible social science that disaggregates the general question concerning possible effects of New Urbanist design on social capital into a number of analyzable relations and then puts the pieces together to consider what we know.	235
New Urbanism and the Generation of Social Capital: Evidence from Orenco Station <i>Bruce Podobnik</i> A New Urbanist development in Portland, Oregon, provides the focus for an interview-based comparative analysis to assess levels of social capital among different neighborhoods.	245
Access to Opportunity: The Biggest Regional Challenge <i>Richard J. Porth</i> The executive director of the Capitol Region Council of Governments in Hartford, Connecticut, underscores the need to address the increasing lack of opportunity confronting low-income people as poverty becomes more concentrated in central cities.	257
Leading and Learning: Multisector Collaboration Yields Civic Change and Lessons on the Nature of Progress <i>John H. McKoy</i> Civic intermediary organizations are playing increasingly important roles in the decision-making and problem-solving networks of our nation's communities. The executive director of DC Agenda details some of the lessons learned in this process.	269

If You Only Knew How Well We Are Performing, You'd Be
Highly Satisfied with the Quality of Our Service 283

Janet M. Kelly

This article by a political scientist cautions that the emphasis on performance measurement within public management may have the unintended effect of reducing government responsiveness to citizens' preferences.

Wireless Youth: Rejuvenating the Net 293

Anthony G. Wilhelm

The vice president for programs at the Benton Foundation examines the challenges and opportunities that the Internet presents for the civic engagement of the next generation.
